***Reissue Applications***

The following office action is in response to the request for reconsideration, the supplemental declaration, and the original patent filed on April 3, 2003.

1. This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest *in order to support the consent to a reissue application required by 37 CFR 1.172(a)*. The submission establishing the ownership interest of the assignee is informal. There is no indication of record that the party who signed the submission is an appropriate party to sign on behalf of the assignee. 37 CFR 3.73(b).

A proper submission establishing ownership interest in the patent, pursuant to 37 CFR 1.172(a), is required in response to this action. The applicant needs to submit a statement specifying the reel and frame under 37CFR 3.73(b) or a copy of assignment papers to establish ownership.

2. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error that is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The declaration must specifically identify an error being corrected. "...Limitations not necessary..." is not specific enough. The applicant should state specific claim language that is in error and is being corrected.

The examiner would also like to point out that the amendments do not conform to 37 CFR 1.173(c). The applicant has not provided an explanation of where the changes made to the claims are supported in the specification.

Claim 21 is rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Recapture exists in the above claim because said claim has omitted the limitations that were presented or argued to obviate the rejection in the original application. Claim 4 of the original application was indicated by the examiner as being allowable because claim 4 contained the limitation of a plurality of nail posts attached to the side of the floor joist retainer body, each positioned and configured to hold a nail with a pointed end extending into a form and a plurality of nails positioned within the nail posts and configured in size to extend a pointed end into a form. Claim 21 recites that the pointed end of the nail extends into one of the forms.

3. Claims 1-3, 5-11, 21 and 22 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.
